

PHUKET DENTAL SIGNATURE

Phuket Dental Signature is Phuket's largest standalone dental center providing the full range of professional dental services. Located centrally in Phuket at the Patong beach area, the dental center consists of over 12 treatment rooms and an in-house dental laboratory. Phuket Dental Signature is equipped with advance digitalized X-rays, CE Certified Autoclave Machines and European designed dental units.

Phuket Dental Signature has 3 separate sterilization rooms to maintain strict infection prevention and controls process as well as for high patient safety standards. Chemical indicators are used in each individual instrument viewpack after undergoing high-steam vacuum pressured autoclaving to double-check our sterilization efforts.

Phuket Dental Signature uses a expertise referral system whereby each portion of an individual's dental treatments is assigned to dentists that has been given special pre-assigned privileges in their specific field of expertise(s) to ensure comprehensive and proper care for successful results.

Phuket Dental Signature is a subsidiary of Thailand's award-winning dental center, Bangkok International Dental Center (BIDC). BIDC is the first Joint Commission International (JCI) accredited dental center in Thailand. BIDC has won numerous awards for its quality, customer focus and outstanding dental care.

The dental group is an official authorized and leading dental implant center in Thailand having successfully treated and handled tens of thousands dental implants including full mouth rehabilitation and reconstruction cases. The dental group transforms smiles with porcelain veneers, dental crowns and is a preferred top provider for teeth whitening treatments in Thailand.

Built on a foundation of a professional code of conduct, international standards and quality care to patients, Phuket Dental Signature and its group is at the fore-front providing professional dental care to the local and overseas community.

One Stop Center for Dental Treatments

PDS gives you quick access for all your dental needs and queries including:

- Free consultation, checkup and treatment plan
- Pre-registration & co-ordination of dental services
- International patient services, hotel information, transport & travel concierge services
- Email or phone consultation & enquiries
- Effective and efficient treatments with no waitlists due to large team of dentists as well as dedicated on-site dental laboratories for quick turnaround timings & logistics

Advance Technologies

State-of-the-art diagnostic technologies such as digitalized panoramic and cephalometric x-rays and intra-oral cameras are utilized at PDS. PDS uses dental implant units, airflow teeth cleaning systems as well as modern dental chairs to ensure that our patients receive safe and effective treatments.

High Sterilization Standards

PDS views sterilization at its utmost importance. PDS always provides a safe and clean environment employing evidence-based CDC, WHO and AAMI infection control and patient safety programs. Our dental appliances are individually sealed, autoclaved and dated in separate view packs for each individual patient. Besides standard test checks, additional biological tests are done on certain items at PDS after autoclaving to double verify total sterilization effectiveness.
